Company Profile

Euratech Industries Sdn. Bhd. has within itself a group of highly trained and dedicated staffs in the design, manufacture, installation and operation of its products. The company is committed to a continuing program of quality and reliable products and services. A comprehensive technical advisory service is available from the company's technical service engineers including design of special customer's requirements, application advice and other information.

First established in year 1987 as a private owned limited company to manufacture innovative advanced thermoplastic ABS pipes and fittings for export market. The company's manufacturing operation was located in Pasir Gudang, Johor to facilitate the export activities.

In year 1991, Antah Holdings Bhd. bought into the shareholding of the company and became one of the member of a new entry that is commonly referred to as Eurapipe group of companies. In late 1998, the whole manufacturing operation was moved to Nilai, Negeri Sembilan. This was part of our expansion program, as the old site was too small with no room for expansion.

In mid 2000, Tyco International bought the company from Antah Holding. Euratech (Malaysia) Sdn. Bhd. was then put under the Tyco Flow Control Division to expand the product range related to water.

In October 2012, Pentair Ltd had merged with Tyco Flow Control and Euratech (Malaysia) Sdn. Bhd. had managed under Pentair Flow Control Division.

In April 2015, Pentair Ltd had sold Euratech (Malaysia) Sdn. Bhd. to local investor and our company had been given a new name as Euratech Industries Sdn. Bhd.

We were the 1st company in the South East Asia region to introduce and manufacture ABS products conformed to local and international standards such as the AS/NZS 3518 and MS1419. In addition, we also produce HDPE (PE100) pipes as well. Euratech Industries Sdn. Bhd. is also accredited to ISO 9001:2008 Quality System.

Our “home-ground” ABS and HDPE (PE100) range of products are widely used in a variety of industries such as:

- a. Water Supply
- b. Water Reticulation
- c. Chilled Water and Condensate Water
- d. Biogas/ POME
- e. Water Treatment Plant (WTP)
- f. Waste Water Treatment Plant (WWTP)
- g. Irrigation
- h. Power Plants
- i. Industrial Waste System
- j. Portable Water
- k. Vacuum Waste System
- l. Shipyard Building
- m. Internal Plumbing

Euratech Industries Sdn. Bhd.

- a. Equity/ Capitalization : MYR 30.8 million
- b. No. of year Established : 28 years (since 1987)
- c. No. of Employees : 42 Employees
- d. Size : Approximately 4 acres land area (Nilai, Negeri Sembilan)
- e. Equipment : 6 extruders for pipe extrusion
6 injection moulding machines for fittings production
6 lathe, bending and drilling machines for large diameter and special fittings
- f. Production Capacity : 4,500 metric tonnes per year

Product Ranges

Eurapipe ABS Pipes and Fittings

1. Eurapipe ABS pipes and fittings made to AS/NZS 3518 and MS1419
2. Size range from DN15 to DN850
3. Pipe Class: PN 4.5 to PN 15
4. Solvent Cement and MEK Cleaner

Eurapipe Advantage[®] PE100 pipes

1. Eurapipe Advantage[®] PE100 pipes are made to MS1058
2. Size range from OD20mm to OD400mm
3. Pipe Class: PN 6.3 to PN 16

Product Standard and Accreditation

- a. Factory certified to ISO9001:2008 QMS by Lloyd's Register (1st ABS pipes and Fitting Manufacturer in Malaysia)
- b. Product approved by IKRAM, SPAN, SIRIM and all other states authorities
- c. Product approved by SAI-GLOBAL (QAS Australia)
